

Excel VBA

Become the Excel developer in your workplace

Learning with a difference...

Benefits

- Save time by eliminating repetitive tasks in Excel
- Add valuable functionality to Excel
- Create custom functions to replace routine calculations

Course content

- Review recording macros
- Learn how to replay macros
- Introduction to the VBA development environment
- Understand basic VB language
- Write and run VBA code
- Use the If and Loop structures to repeat processes
- Learn how to identify and correct faulty code
- Error handling techniques
- Use Excel's built-in form features
- Create and run your own custom user forms
- Create formula functions that are not already available in Excel
- Add buttons and menu commands to Excel

Course overview

Visual Basic for Applications is a built-in development environment for Microsoft Office. This course concentrates on teaching you how to build custom solutions in Excel defined by your own business requirements.

You will learn how to write macros that cannot be created by using the macro recording tool in Excel. Learn to add toolbar buttons and menus that run your macros. This course will also show you how to distribute these macros so colleagues may also benefit from your VBA knowledge.

Throughout the 2-day course you will have ample opportunity to practise writing robust VB code. You will also receive an exercise booklet that contains example solutions to all of the exercises.

Duration

2 days
9:30 - 4:30

Refreshments are provided on arrival, mid-morning and mid-afternoon. A buffet-style lunch is also provided.
